

VAM Make bigger Boobs

Select the Model, make sure you are in the Control Tab, then click on Select Root

Go to the Female Morphs Tab, type in breast preset in the textfield (1) only breast enlarging sliders will appear then, slide up the slider (2) to the size you want the boobs
 Other sliders will have other effects, for example slider (3) will make it bigger but they stay tight and less hanging
 If not big enough yet, slide up another slider and they get even bigger
 If you remove the text from the textfield, all body modification options will show up, just check it out and play around to figure out, what is useful for you.
 You then will also see a lot more tabs (4) to choose.
