

VAM: How to enable manual character undressing

A quick guide by u/JustLookingForNothin

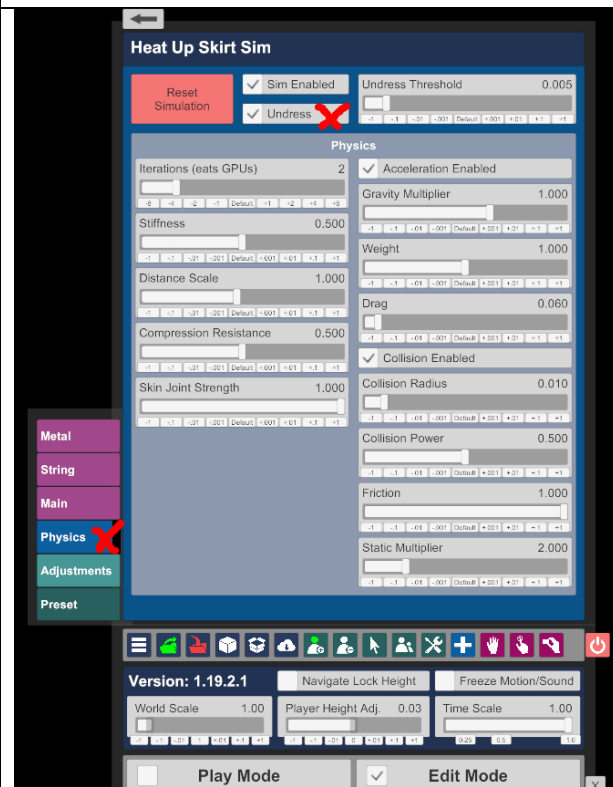

1. Make sure that the marked VR settings are set as shown in the screenshot.

2. Only "Sim" clothes can be manually undressed, other clothing types not. Note: to reach this view, "Edit mode" must be enabled (not available in free version).

3. To enable undress in the sim clothing, click "Customize" button.

4. Click on the "Physics" tab, then enable the "Undress" toggle. The slider "Undress Threshold" defines, how easy a clothing item can be removed by virtual hands.
